ASV Indianapolis PGY2 Critical Care Residency

Supplemental Questions

Reflecting on your PGY1 rotations please provide one piece of critical feedback you have received from one of your preceptors on a direct patient care rotation. Explain how you have incorporated this feedback into your practice and/or worked to improve in this area.

PGY2 residents often balance multiple concurrent responsibilities, including clinical services, research, precepting, and administrative/leadership activities. Describe a specific time you had competing deadlines or high-acuity demands. How did you prioritize and organize tasks, and what did you learn about your own work habits or decision making under pressure?

PGY2 training requires continual self-assessment and adjustment of learning goals. How do you currently evaluate your own progress toward professional and clinical competency goals, and how do you adapt your workload or strategies when you identify an area for improvement?
